Hi hitesh,

Thank you for checking in. Here is where things stand on our group project as of [date].

Progress so far: I have finished the research and first draft of my section, [section name], and it is saved in our shared folder. I have also reviewed the drafts from [teammate names] and left comments on the sections that overlap with mine. Overall, we are roughly [percentage, e.g., 70%] complete.

Challenges: One challenge has been aligning the formatting and citation style across sections, since each of us started with a different approach. I am also still waiting on the data from [teammate or source], which has slowed down the final analysis. I do not expect this to be a major problem if we resolve it soon.

Expected completion: Based on our current pace, I expect my remaining work to be done by [date], and the full project to be ready for final review by [date], ahead of our [deadline date] due date.

To keep us on track, could you confirm by [day] whether we can hold a short check-in meeting to settle the formatting style and follow up on the missing data? I am happy to take the lead on merging the sections once everyone has finished.

Thank you for keeping the team organized.

Best regards,
[karthikeya]
